DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-13, 24-31, and 34-46 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1, lines 3 and 4, the applicant has positively recited the combination of the door and refrigerated compartment. It is suggested that the applicant use the phrase "adapted to" when referring to unclaimed elements or use functional language that does not positively recite unclaimed elements. Claims 5, 6, 8, 34, 38, 41, 43, 44, and 45, recite similar ambiguities.

With respect to claim 24, subparagraph "b", it is unclear as to how the mounting plate has a curved section cantilevered away from itself. Correction is required.

Allowable Subject Matter

Claims 14-33 allowed.

Claims 1 and 34 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. The primary reason for the allowance of claim 14 is the inclusion of the combination of the door, compartment, hinge set, and door control assembly, the assembly having a canopy cover attached to the mounting plate and overlying the door control mechanism and cantilevered over the flange attached to the door

frame. For claim 24, it is the inclusion of the cover overlying the control mechanism and attached to the mounting plate at a second end thereof. For claim 32, it is the inclusion of the structure of subparagraphs "a", "b", and "e". For claim 1 it is the inclusion of the structure of subparagraphs "c-g". For claim 34, it is the inclusion of the structure of subparagraphs c and d. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Luker #6,609,400, Hamatani et al #5,687,452, Geringer et al #5,525,880, and Cook et al #4,210,349 are cited to teach door check assemblies.
